**Subject:** USCIS Message: Students Applying for Naturalization

Dear Stakeholder,

If you work with students (18 years of age or older) who are applying for naturalization and their educational institution is outside of their home state, they may have [two options](#) for filing the application based on where they go to school, or where their family lives (if they are unmarried and still financially dependent on their parents).

We have several resources to help students explore filing options, learn about the naturalization process and study for the civics and English tests. The [Citizenship Resource Center](#) has numerous preparation resources. For example, you can find information on the eligibility requirements for naturalization on the [Path to U.S. Citizenship](#) and [Learn About Naturalization](#) pages.

Remember, the wrong help can hurt! To learn information on protecting yourself against immigration services scams, visit our Avoid Scams web page, at [uscis.gov/avoidscams](http://uscis.gov/avoidscams). This site contains information on common scams, form filing tips, how to find legal services and where to report immigration scams.

Kind Regards,

Public Engagement Division

US Citizenship and Immigration Services
